Construction
for NetSuite

Does your Construction company...

- Suffer from not having real-time control of overruns on purchase orders?

- Need a single view of your entire business? Or of your multi-company enterprise?

- Need to see an up-to-date, accurate and detailed progress status report of all your projects on demand?

- Need real-time updating of supplier pricing for better estimating and purchasing?

- Need real-time visibility of your actual cash flow position to make better management decisions?

- Waste valuable staff time manually entering the same data in multiple systems and then cleaning up costly errors?

- Lack confidence that your construction management systems can scale as your company grows?

Let's Take You to the Next Level

Construction for NetSuite is a robust cloud-based Construction Management Solution built on the world's #1 cloud ERP platform, Oracle NetSuite. Seamlessly integrated, it combines world-class accounting designed for construction with powerful job costing. This solution adjusts to your current best practices while providing a "single-source" of truth for making the best decisions.

What to Expect

1. 360° visibility of your whole enterprise
2. Powerful job costing and forecasting
3. Robust accounting designed for construction
4. Fully scalable supporting unlimited projects
5. More precise bids
6. Real-time tools that eliminate margin erosion
7. Future-proof technology that keeps you updated
