Built Natively in NetSuite

File Storage for NetSuite is 100% natively integrated with your existing NetSuite products so that all activity is handled in real-time and with full visibility. Using this application feels like "you have never left NetSuite" – it's a seamless experience.

How it Works

1. Quick installation
2. Open Gantt inside NetSuite
3. Import schedules from Excel or build from scratch
4. Insert milestones, durations, dependencies, critical paths, baselines
5. Modify and customize as project demands

Special Features

Commercial-grade Gantt Chart
- Link tasks to automatically calculate task dependencies
- Automatic adjustment of the timeline when changing individual tasks
- Displays the project baseline to compare the budgeted timeline against actual
- Easy to use "drag and drop" interface
- Multiple Gantts available per project

Timeline Management
- Project Management
- Resource Management
- Timeline Reporting
- Baseline Reporting

Project Resource Management
- Allocates resources to tasks
- Provides automatic reminders and alerts to resources of task due dates
- Manages resource allocation to prevent over or underutilization

Custom Color Coding
- Provides a baseline view of the timeline
- Allows for task differentiation for easy reporting
- Tracks completed vs. pending tasks quickly and efficiently
